SUMMARY

Computer Science graduate specializing in Artificial Intelligence, Machine Learning, and workflow automation, with hands-on experience building AI-native tooling and automation systems that improve operational efficiency and productivity. Skilled at rapidly onboarding to existing AI and automation projects and delivering data-driven solutions from prototype to production, with a focus on process improvement and continuous enhancement.

EDUCATION

Vellore Institute of Technology <i>B.Tech in Computer Science and Engineering; CGPA: 8.22</i>	Amaravati, India 2022 – 2026
DAV Public School (CBSE) <i>Class XII; Percentage: 84%</i>	Patna, India 2019 – 2021

WORK EXPERIENCE

Silicofeller Quantum <i>AI Lead Engineer Intern</i> - Identified, proposed, and implemented AI-native research workflows and automation opportunities to improve operational efficiency, productivity, and R&D process effectiveness, reporting directly to the Founder & CEO. - Architected internal AI tooling, benchmarking systems, and workflow automation that accelerated execution and continuous improvement across the Quantum Core platform. - Drove model prototyping and cross-functional technical deliverables, analyzing emerging AI technologies to enhance process effectiveness in a fast-paced startup environment.	New Delhi, India June 2026 – Present
Advitia Labs <i>Software Development Engineer</i> - Developed and maintained scalable backend services and APIs, optimizing system workflows to improve operational efficiency and product stability. - Investigated production issues and collaborated with cross-functional teams on ongoing maintenance, enhancement, and continuous improvement of live systems, documentation, and UI/UX.	Guntur, India Dec 2025 – May 2026

PROJECTS

LLM-Powered Sentiment Analysis System <i>Python, NLTK, scikit-learn, LLMs</i> - Built an AI-powered sentiment analysis system for real-time processing of social media, customer reviews, and market data using large language models and machine learning. - Engineered end-to-end NLP pipelines with text preprocessing, tokenization, vectorization, and supervised classifiers, achieving 94% accuracy and boosting customer satisfaction by 25%.	2024
AI-Powered Task Automation System <i>Python, React, Node.js, Express, MongoDB</i> - Built a full-stack automation platform with JWT authentication and WebSocket-based real-time updates, streamlining workflows and improving team productivity. - Designed RESTful APIs and integrated a machine learning model for automated task prioritization, improving productivity tracking and process efficiency by 40%.	2025

TECHNICAL SKILLS

AI & Automation: Machine Learning, Deep Learning, NLP, LLMs, Generative AI, Workflow Automation, Model Prototyping, Benchmarking
Languages & Frameworks: Python, Java, JavaScript, React.js, Express.js, Node.js, SQL
Data & Libraries: Pandas, NumPy, scikit-learn, NLTK, Tableau, Jupyter Notebook
Tools & Platforms: Git, GitHub, MongoDB, PostgreSQL, REST API, AWS, GCP, Agile

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 – Certified Data Science Professional & Generative AI Professional
AWS Certified Solutions Architect (Associate)
J.P. Morgan Investment Banking Job Simulation

ACHIEVEMENTS & LEADERSHIP

Captain, University Basketball Team: Led the team to multiple event wins through strategy and teamwork.
Winner, VTAPP 2024 Fest: 1st (Inter-College Debate), 3rd (NULL Coding Hackathon), and finalist at IIT Madras Paradox (Logic Loom), a national logical reasoning competition.
Student Coordinator, VTAPP 2025: Managed logistics for a technical fest with 1,000+ participants.
